Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has established a maximum residue limit (MRL) for tebufenpyrad in or on grapes to permit the import and sale of foods containing such residues.

The MRL was proposed in the consultation document published on 14 May 2012, Proposed Maximum Residue Limit PMRL2012-11, *Tebufenpyrad*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRL was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRL for tebufenpyrad takes legal effect in Canada as of the publication date of this document

Established Maximum Residue Limit for Tebufenpyrad

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Tebufenpyrad	4-chloro-*N*-[[4-(1,1-dimethylethyl)phenyl]methyl]-3-ethyl-1-methyl-1*H*-pyrazole-5-carboxamide	0.5	Grapes

ppm = parts per million

A list of pesticide MRLs established in Canada, as of the date indicated, can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
